

KEY INVESTOR INFORMATION

GBP B CLASS

This document provides you with key investor information about the Dominion Global Trends – Managed Fund (“Managed Fund”).

It is not marketing material. The information is required by law to help you to understand the nature and risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

Dominion Global Trends – Managed Fund a sub-fund of Dominion Global Trends SICAV p.l.c.

Managed GBP B Class – (ISIN: MT7000019758). This Sub-Fund is self-managed.

Objectives and Investment Policy

The Investment Objective of Managed Fund is to achieve medium to long term capital growth. Managed Fund aims to achieve this primarily through investment in a diversified portfolio of securities which conforms to the Investment Manager’s view of evolving global trends and which offer the potential for the greatest returns at any given time. Investments will not be limited to any particular sector or geographical region.

The securities used within the portfolio may include companies, funds, debt securities and cash (or near cash instruments). Up to 10% of the assets may be invested in securities which are unlisted, but which intend to list within 12 months of purchase or funds which are not authorised or recognised by the UK regulator. These are known as unregulated collective investment schemes.

Managed Fund may also use financial derivative instruments (financial instruments where the value is linked to the expected future price movements of the underlying assets) to protect the value of Managed Fund’s assets. This is limited to a maximum of 10% of the total value of Managed Fund at any time. Managed Fund may also invest in other assets, such as cash (or near cash instruments) or debt securities.

The income in respect of shares in the Managed Fund is not distributed but is retained.

You can buy and sell the shares on any business day in Malta.

Risk and Reward Profile

The above risk and reward indicator rates this Share Class as category 5 meaning that it offers a relatively higher risk of making a loss but also a relatively higher chance of making gains. It should be noted that even the lowest category on the indicator does not mean risk free.

Managed Fund’s rating on this indicator is based on historical data and therefore may not be a reliable indication of the risk profile of Managed Fund in the future. Further, the rating shown is not guaranteed and may change over time.

Managed Fund’s rating reflects the nature of its investments and the corresponding risks to which it is exposed. These risk factors, which include the following risks, may affect the value of Managed Fund’s investments or expose it to losses:

Investment Risk

The price of the Shares and the income (if any) from them may go down as well as up reflecting the risk of investing in international markets and that investors may not receive back the amount that they originally invested.

Currency Risk

Any investments in international companies will mean that changes in currency exchange rates will have an impact on Managed Fund.

Managed Investment Risk

It cannot be guaranteed that investments in global strategic trends will generate continued growth in the future. It is also possible that the Fund may not be able to identify sufficient high-quality investment opportunities.

Counterparty Risk

Currency forward contracts, swaps and other forms of FDIs are not guaranteed by an exchange or its clearing house. Consequently, there are no requirements with respect to record keeping, financial responsibility or segregation of customer funds and positions. The business failure of a counterparty with which the Company has entered into “a trade” will most likely result in a default. The default of a party with which the Company has entered into “a trade” will force the Company to cover its resale or repurchase commitments, if any, at the then current market price. The Company is also exposed to the risk of failure by a counterparty to perform its obligations under an OTC FDI contract. Transactions in over-the-counter markets are not subject to the same regulatory oversight as exchange-based markets.

Efficient Portfolio Management Risk

The entry into derivative or forward transactions in a currency for the purposes of efficient portfolio management involves certain risks such as movement in interest rates, price of investments being hedged and the correlation between those types of investments and equities.

Such techniques may improve the return on invested capital but may also increase the risk of losses to the Sub Fund.

Business Risk

In certain circumstances if the Net Asset Value of the Company falls below €20 million (or €5 million in the case of a class of shares) on each dealing day within a consecutive 6 month period the shares in the Company or the class may be compulsorily redeemed.

Credit Risk

Investors should be aware that an investment might involve credit risk. Debt securities held for a Sub-Fund involve credit risk represented by the possibility of default by the issuer. This risk may be evidenced by the issuer’s credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated and/or unsubordinated securities. In the event that any issuer of debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). This may in turn affect the NAV per Share.

The approach to calculating the Risk and Reward Profile as above uses historic data. This methodology cannot accurately reflect the Counterparty Risk, Efficient Portfolio Management Risk, Business Risk and Credit Risk. Full details of these Risks amongst others, can be found in the Section entitled ‘Risk Factors’ in the Sub Fund’s Prospectus. The section entitled ‘Practical Information’ below explains how you may obtain a free copy of the Prospectus and other useful information.

Charges

The charges you pay are used to pay the costs of running Managed Fund, including the costs of marketing and distributing it.

These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest¹

Initial Charge	Up to 6.5% of the Subscription Price
Exit Charge	None

1 This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investments are paid out.

Charges taken from the fund over each year²

Ongoing Charge	3.26%
----------------	-------

2 This figure may vary from year to year.

Charges taken from the fund under specific conditions

Performance Fee	None
Switching Fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charge figure is based on expenses for the year ending 31 December 2020. This figure may vary from year to year. It generally excludes Portfolio transaction costs, except in the case of an entry/exit charge paid by Managed Fund when buying or selling units in another collective investment undertaking.

For more information regarding charges, please see the Section entitled “Fees, Compensation and Expenses” in the Sub-Fund’s Prospectus. The section entitled “Practical Information” below explains how you may obtain a free copy of the Prospectus and other useful information.

Past Performance
